

e-ISuite 1.1.0 Release Notes

Date: July 21, 2015
Version: e-ISuite Version 1.1.0

Description: The primary focus of this release is to address known issues and newly identified defects in release 1.0.1 and to add the following new functionality:

- Glide Path
- Message Board Customization (Site Only)
- IRWIN Interface (Enterprise Only)

Additional information is also available on the e-ISuite Webpage: <http://eisuite.nwcg.gov>

These release notes are broken into 3 sections:

- e-ISuite Enterprise Version 1.1.0
- e-ISuite Site Production Version 1.1.0
- Summary Release Information

e-ISuite Enterprise Version 1.1.0

(No Installation Necessary)

The e-ISuite Enterprise System is hosted on the USFS Fire and Aviation Management National Enterprise Support System (NESS) General Support System (GSS) at the National Information Technology Center (NITC), Kansas City, MO and will support all incidents at an Enterprise level.

- e-ISuite Enterprise is accessed on the following URL:
<https://eisuite-app.nwcg.gov/eisuite/fx/welcome.html>

NEW e-ISuite Enterprise IRWIN Interface

IRWIN is a National Wildfire Coordinating Group (NWCG) affiliated Information Technology (IT) system and an Interior Fire Executive Council (IFEC) endorsed project to develop an "end-to-end" fire reporting capability that provides an integrated and coordinated process for collecting and reporting incident/event data. By interconnecting systems, new and updated information would automatically be available to the different interagency systems. For more information on IRWIN, please visit the following Webpage: <http://www.doi.gov/pmb/owf/IRWIN.cfm>

The new interface allows users to import or link e-ISuite incident data with IRWIN Data. e-ISuite is only reading the following fields from IRWIN:

- Event Type
- Incident Name
- Incident Number
- Incident State
- Incident Start Date

The e-ISuite project team is working on additional user documentation to further address the IRWIN interface.

e-ISuite Site Production Version 1.1.0

The e-ISuite Incident Site version is hosted on a local server; very similar to how legacy I-Suite is managed today. It only requires the software to be installed on the Server machine. Clients will access the application through their local browser. Due to significant code and database changes, there will be no update patch for Release 1.1.0. To download the e-ISuite Full Production version 1.1.0 visit the Site Download page on the e-ISuite Webpage

<http://eisuite.nwcg.gov/new/downloads.htm>

Important Things to Know Prior to Installing e-ISuite Site 1.1.0 Full Release

- **YOU MUST UNINSTALL** all previous versions of e-ISuite Site.
Note: See detailed uninstall instructions on the following page
- System Requirements
 - Windows 7 Professional or Windows 2003/2008/2012 Server
Will install and run on Windows XP, but is not a supported operating system
 - No competing http Services (Tomcat6 will provide web services on server machine)
 - Must have Visual C++ 2010 Runtime Redistributable installed
- Browser Requirements
 - Internet Explorer 11 Officially Supported
 - Pop-up Blockers Turned Off
 - Latest Adobe Flash Installed
- System Administrative privileges **are** required to install the application.
Note: For installation on Forest Service agency machines refer to the agency's PowerBroker installation procedures located on the Forest Service CIO home page.
- For more information Download the Site Installation and e-ISuite Site Setup Basics PowerPoints located on the Helpful Resources page.
<http://eisuite.nwcg.gov/new/helpfulresources.htm>
- See the Site e-ISuite Account Manager User Guide for additional information on establishing user accounts in Site and assigning roles and access to incidents.
<http://eisuite.nwcg.gov/Docs/UserGuides/AccountManager.pdf>
- An Online Tutorial for the Site Account Manager is also available on the e-ISuite Webpage under Online Tutorials.
<http://eisuite.nwcg.gov/new/onlinetutorials.htm>

e-ISuite Site Version 1.1.0 Installation Instructions when Previous Version is Installed

Step 1: Copy all the files in the NWCG-BACKUPS folder from C:\ProgramData\e-ISuite to another location such as a USB Drive or External Hard Drive. By default, e-ISuite backups are stored in the following directory: C:\ProgramData\e-ISuite\NWCG-Backups

Note: Users should copy everything in that directory to a different location (either an external hard drive, a USB drive, or another location on their machine)

Step 2: Uninstall their current version of e-ISuite. The safest way to uninstall e-ISuite is to use the e-ISuite uninstaller in the start menu under Start Menu > All Programs > e-ISuite. Users must run that uninstaller by right-clicking on Uninstall e-ISuite Site and picking either Run Elevated (USFS Users) or Run As Administrator (all other users).

Step 3: Users will be required to reboot their systems after they uninstall e-ISuite.

Step 4: After the system reboots, users need to delete the e-ISuite folder from C:\ProgramData. Note that elevated privileges are required to delete items from C:\ProgramData - either Run Elevated Privileges for USFS Users or Administrator Privileges for other users.

Note: The C:\ProgramData folder may not be visible if users have their folder settings set to not show hidden files and folders. If it is not visible, users can temporarily change their Folder Settings to show hidden files and folders under the Control Panel > Appearance and Personalization > Folder Options)

Step 5: After deleting the e-ISuite folder from C:\ProgramData, users may proceed with the installation of e-ISuite Site 1.1.0.

Release 1.1.0 Summary

Defect ID	Functional Area	Summary
NEW	Incident Add/Edit	IRWIN Interface: The new interface allows users to import or link e-ISuite incident data with IRWIN Data (Enterprise Only)
NEW	Demob Reports	The ability to create a Resource Glide Path is now available on the Plans – Demob Reports Tab.
NEW	Account Manager (Site)	The ability to customize the Site message board is available. This is accessed through the Site Account Manger Role.
4917	Custom Reports	Full Incident number will correctly display when generating Custom Reports.
